Dear Commission,

Thank you for taking this public comment. I would first like you to be aware that the email address "commission.streamlining@sfgov.org" listed on your homepage results in a bounce back. Are you intentionally not making it hard for citizens to publicly comment on commissions?

I am in support of eliminating the bicycle advisory committee at the SFMTA. This group offers no actual recommendations and has in recent years become a platform for activism. They demand that SFMTA share insider knowledge so that they can influence policies against every day san franciscans. They also have little oversight and often go off agenda and brown's rules. Time to dismantle this busy body.
