Hello,.

I am a member of the Park Open Space Advisory Committee representing District One. This committee serves a valuable purpose, as a liaison between the supervisor's office, the residence of District One, and the Park staff.

When residents have concerns about Parks in their district, they can bring them to the committee members, who can help resolve the issues. Also, the Committee plays an essential role as a sounding board for new projects that the Rec and Park wants to pursue, and offers valuable information to staff in making recommendations for a new or improved Park property..
Please consider keeping our committee.

Best,
Richard Rothman, District One representative
