I have to say, this Streamlining Commission sounds so much like a local version of the **Department of Government Efficiency**.

**Do not get rid of the** Disability and Aging Commission in its current role as Governing Body. San Francisco has a high proportion of seniors and people with disabilities who are living on the edge because of high rents and high living costs. They must be cared for and given opportunity for a meaningful life.

Do give the Mayor appointment power to control of what should be public input.
