I support the commission in every way possible to continue to support our local animal shelter in every way possible it should not be eliminated in any way we need this commission now than ever before because of the overcrowded and how people throwing away there pets is if they were garbage. I encourage you to continue working with the commission and in the future, we need to eliminate the word property from our from our minds and instead seeing these animals as creatures created by God to give us love and support to guide us in every way possible, if given the chance so they are not pieces of property as a chair in your living room would be, but rather loving and caring being created by the father in heaven. God name dog after him remember so they should not be considered or a piece of property any longer..

I've been a long time supporter of our animal shelter and I think they're absolutely marvelous, but they need our help in so many wonderful ways as they are facing overcrowding causing them to kill otherwise healthy animals! I myself is a senior who is disabled. I am traumatic brain, entry legally blind, and have mobility problems, and I use a service dog to assist me in my daily life. Matter fact I have two and both dogs adopted and trained to assist me in my daily life.

So please eliminate the word property when hairdressing our animals in great need as I explain they are not property as you have your living room chair.

Sincerely, with great appreciation.
Anaperla Aureoles.
