Dear Commissioners, Your review of San Francisco's commissions is greatly appreciated. Government simplification is difficult and your commitment to this endeavor is admirable.

I also request that the Commission on the Environment continue to be a decision making body. Oversight would be greatly reduced if it were reduced to advisory status. The Commission has been essential to the Climate Action Plan's advancement by guaranteeing San Francisco's leadership in sustainability. Upholding the Commission's jurisdiction is essential for public health, climate progress, and accountability. We need a strong Commission to prevent Mayor's from diluting and delaying the city's critical work on climate change and the environment.

Peter Belden
