Dear Commission Streamlining Task Force Members,

While your votes may technically be only recommendations, the Board of Supervisors will certainly take note that the four women on this task force supported downgrading and stripping authority from the Commission on the Status of Women. That action will make it much easier for the Board of Supervisors and the Mayor to justify phasing out the Commission on the Status of Women altogether, as well as the many other important commissions you have effectively rendered powerless through your recommendations.

There is still time to support the community and protect our democracy before your final report goes to the city attorney

Sophia Andary  
Commissioner\*, Commission on the Status of Women
