Commissioners Streamlining Task Force,

I am a grandmother, retired SFUSD high school teacher, & long time resident of BVHP. The Commission Streamlining Task Force's recommendation to downgrade the Commission on the Environment to advisory status - and after 3 years to eliminate it altogether - is damaging to San Francisco's reputation as a climate leader, to say nothing of the actual health and safety of City residents. As a consequence of the US Govt ignoring the environmental consequences of HP Shipyard contamination, many residents, particularly black workers, have had their lives shortened by this governmental failure. Don't let this happen again.

The Commission on the Environment promotes environmental justice by directing funding and programs to communities most impacted by pollution and climate change; it strengthens workforce development by investing in youth climate internships and green jobs; it provides residents a formal platform to speak out and influence policy. These are just some of its functions.

I help maintain & further develop our Northridge Co-op Homes Community Garden. We need more support, not less.

Now more than ever, the world needs climate leadership from local governments - not heads in the sand. Drastic cuts to the SF Environment Department in the recent 2-year budget revealed an ominous willingness to ignore action to prevent the ever-increasing severity of climate disasters. Gutting and cutting the Department's oversight body only reinforces this impression. It will not streamline government - it will make it harder for the City to keep its focus on eliminating the cause of global warming. Other departments are each much more focused on their primary mission; it is SFE alone, directed by the Commission, whose mission is to reduce emissions citywide and protect our climate.

Mishwa Lee
