Hello All,

Attached and in a screenshot below is a compilation of ACC quarterly intake reports from 2023 through 2025Q1. While intake of both Cats and Other animals has fluctuated over the past two years, intake of dogs has risen consistently quarter over quarter. It has gone from 635 in 2023Q1 to 845 in 2025Q1.

It would be helpful to know the causes for these increases and any actions that can be taken to reduce the continually growing number. Certainly abandoned dogs are more visible than abandoned cats. However 2025 seems long enough since the return to the post pandemic new normal that pet dumping due to ill considered adoption in 2020 should be in the past.

Thank you for your consideration.
