permit, to post an example of a complete, approved application and an example of a complete set of postentitlement phase permits for at least 5 types of housing development projects in the jurisdiction, as specified, and to make those items available to all applicants for these permits no later than January 1, 2024. Current law defines "postentitlement phase permit" to include all nondiscretionary permits and reviews filed after the entitlement process has been completed that are required or issued by the local agency to begin construction of a development that is intended to be at least 2/3 residential, excluding discretionary and ministerial planning permits, entitlements, and certain other permits and reviews. These permits include, but are not limited to, building permits and all interdepartmental review required for the issuance of a building permit, permits for minor or standard off-site improvements, permits for demolition, and permits for minor or standard excavation and grading. This bill would modify the definition of "postentitlement phase permit" to also include all building permits and other permits issued under the California Building Standards Code or any applicable local building code for the construction, demolition, or alteration of buildings, whether discretionary or nondiscretionary.

AB 548 (**Boerner D**) **State Housing Law: inspection.**

Current Text: Amended: 4/13/2023 [html](#) [pdf](#)

Status: 4/26/2023-In committee: Set, first hearing. Referred to suspense file.

Summary:

Current law authorizes an officer, employee, or agent of an enforcement agency to enter and inspect any building or premises whenever necessary to secure compliance with, or prevent a violation of, any provision of the State Housing Law, the building standards published in the State Building Standards Code, and other rules and regulations promulgated pursuant to the provisions of the State Housing Law that the enforcement agency has the power to enforce. Current law deems a building, portion of a building, or premises on which a building is located to be a substandard building if any one of specified conditions exists to the extent that it endangers the life, limb, health, property, safety, or welfare of the public or its occupants. Current law deems a building, portion of a building, or premises on which a building is located to be in violation of the State Housing Law if it contains lead hazards, as specified, that are likely to endanger the health of the public or the occupants. This bill would require local enforcement agencies to develop policies and procedures for inspecting a building with multiple units if an inspector or code enforcement officer has determined that a unit is substandard or is in violation of the State Housing Law, and the inspector or code enforcement officer determines that the defects or violations have the potential to affect other units of the building, as specified.
