Secretary Alice Hur,

I am writing in support of San Francisco Environment Department's request to increase by \$3 million the amount they receive from Recology to fund our City's voter-mandated Zero Waste goals.

San Francisco voters passed Proposition F in 2022 to ensure that Recology must be working to address San Francisco's environmental needs.

I believe the \$3 million is a relatively modest amount given the tremendous need.

As with every voter, I am concerned about toxic waste.

However, I personally am most concerned about methane, because it is over 80 times more powerful greenhouse gas than carbon dioxide in the short term.

We all must do our part to address climate change, and that needs to include Recology paying another \$3 million.
