

CERTIFICATION OF EXEMPTION FROM HACCP PLAN FOR REDUCED-OXYGEN PACKAGING

While **California Retail Food Code (CRFC), Section 114419 9(b)** requires food facilities to obtain Hazard Analysis Critical Control Point (HACCP) Plan that has been **approved** by California Department of Public Health (CDPH) to engage in packaging of potentially hazardous food (PHF) using reduced-oxygen packaging (ROP), the **FDA Food Code Section 3-502.12 (F)** exempts food facilities from a state approved HACCP Plan when a food establishment uses a ROP method to package PHF that is always:

1. Labeled with the production time and date;
2. Held at 5°C (41°F) or less during refrigerated storage, and;
3. Removed from its package in the food establishment within 48 hours after packaging.

This form must be submitted to SFDPH prior to engaging in ROP. This includes conducting sous vide and cook chill for culinary purposes. Additional documents may be requested. All equipment used for ROP must be commercial grade, NSF approved.
