About SFDPH's Health Care for the Homeless Program

Primary Care is at the center of our complete system of care. Fourteen (14) primary care health centers/programs are located in neighborhoods throughout San Francisco. We provide high-quality, compassionate care to the City's children, youth, adults, and elders regardless of immigration status or ability to pay. Health Center services are also delivered at select shelter and school-based sites throughout the City to increase access.

On-site specialty services include prenatal care and family planning services, integrated behavioral health and substance abuse services, dental, gender health, nutrition, pharmacy, and podiatry services, integrative health services such as acupuncture, and care for people experiencing homelessness and refugees/asylum seekers.

Health Care for the Homeless (HCH) is a federal grant program administered by the Health Resources and Services Administration (HRSA) that funds a portion of the care available to people experiencing homelessness. This grant requires a clear structure to incorporate and prioritize patient input into health center management decisions. The San Francisco HCH Co-Applicant Board will collaborate with the City to ensure patient voice and input is at the forefront of programmatic decisions.
